PROFESSIONAL SUMMARY

Final-year Computer Engineering student at Thapar with hands-on backend and AI engineering experience across **Java, Spring Boot, MySQL, Python, and FastAPI**. Competitive programmer with **500+ problems solved** on [Codeforces](#), [LeetCode](#), and [CodeChef](#), GATE 2025 qualifier, and co-author of an IEEE 2025 publication.

EDUCATION

Thapar Institute of Engineering & Technology, Patiala

B.Tech in Computer Engineering

2022–2026

CGPA: **9.29**

Peace Public School (PPS)

12th CBSE

2020–2022

94%

EXPERIENCE

SDE Intern – zHealth

Jan 2026 – Jun 2026

Java, Spring Boot, JSP, JavaScript, MySQL

Remote

- Developing an Inter-Office Communication (IOC) platform used by **10,000+ healthcare providers** using **Java, Spring Boot, JSP, JavaScript, and MySQL**.
- Built **patient tagging** and **cross-organization messaging** features to improve provider collaboration and care coordination.
- Contributing across the full stack in an Agile environment, including development, code reviews, testing, and deployments.
- Optimized inbox polling architecture by refactoring to a lightweight JSON endpoint with client-side rendering, reducing polling overhead by **30%**.

SDE Intern – VitruveVice

June 2025 – July 2025

React.js, Next.js, HTML, CSS, JavaScript

Onsite

- Developed a responsive Inventory Management Web Application using React.js, Next.js, HTML, CSS, and JavaScript.
- Integrated RESTful APIs and managed data flow between front-end and back-end components.
- Worked with database systems for efficient inventory tracking and CRUD operations.

PROJECTS

SmartPrep | *Next.js, Shadcn, Vapi, Firebase* | [Live Site](#)

June 2025 – July 2025

- AI-driven mock interview platform designed to help candidates prepare for technical and behavioural interviews.
- Used Next.js to model the front-end using React hooks; Shadcn for UI components; Vapi workflow for AI interview logic.
- Implemented authentication and stored user profiles and interview history using Firebase.

Fake News Detection ML Project | *Logistic Regression, Random Forest, Scikit-learn* | 

July 2025 – August 2025

- Achieved **90% accuracy** in detecting fake news by building a scalable ML pipeline using TF-IDF vectorization and Logistic Regression on a dataset of 40,000+ news articles.
- Applied end-to-end NLP preprocessing and feature engineering, achieving **99.4% accuracy** in sentiment classification.

RankPulse | *Flask, MySQL, Groq, SerpApi, scikit-learn* | [Live Site](#)

May 2026 – June 2026

- Built a full-stack web platform that analyzes healthcare practice websites and scores them across 12 weighted SEO, performance, and patient-engagement criteria.
- Combined rule-based web scraping with **Groq LLM analysis** using a weighted confidence model to improve scoring accuracy on ambiguous signals.
- Integrated live Google ranking checks via **SerpApi**, Google PageSpeed Insights, and geolocation/competitor discovery via **Nominatim**, plus an ML-based rank predictor trained on real and synthetic data.

TECHNICAL SKILLS & INTERESTS

Languages: HTML, CSS, JavaScript, React.js, Node.js, C++, Python

Network Simulation: GNS3, Cisco Packet Tracer | **Databases:** Relational Database, MySQL

Frameworks & Tools: Spring Boot, Hibernate, REST APIs, Git, Agile/Scrum

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Computer Networks & Network Programming

Areas of Interest: Web Development, **AI/ML & Data Science**, Computer Networks

HONORS & ACHIEVEMENTS

- Research:** Co-authored IEEE 2025 paper on *Weed Detection in Potato Fields Using YOLO-Based Deep Learning Models* | 
- Solved 500+ Algorithmic Problems** on Codechef, Codeforces, LeetCode, GeeksforGeeks | 
- Secured **7th rank at the district level** in Matriculation (ICSE Boards 2020).
- Cleared **GATE 2025** with rank under 5000 in 3rd year.
- Merit Scholarship – Thapar Institute:** Top 5% of students, three consecutive years.
